Month 1

ERP & Business Central Foundations

Duration 4 weeks

Month Journey

Week 1: ERP concepts, business processes and integrated data

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 2: Business Central interface, role centres and navigation

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 3: Order-to-cash and procure-to-pay process mapping

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 4: Master versus transactional data; foundation assessment

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Month 2

Company Setup, Security & Master Data

Duration 4 weeks

Month Journey

Week 1: Company profile, setup checklists and number series

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Week 2: User roles, permission concepts and segregation of duties

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 3: Customer, vendor, item and dimension master records

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 4: Data quality, governance and configuration review

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Month 3

Finance Configuration & General Ledger

Duration 4 weeks

Month Journey

Week 1: Chart of accounts and financial structure

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 2: General posting groups and posting setup logic

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 3: Journals, posting dates, source documents and audit trails

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 4: Ledger tracing and financial configuration troubleshooting

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Month 4

Receivables, Payables, Banking & Fixed Assets

Duration 4 weeks

Month Journey

Week 1: Customer entries, receivables and payment applications

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 2: Vendor entries, payables and payment processing

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 3: Bank accounts, reconciliation and cash controls

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 4: Fixed assets, depreciation and month-end review

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Month 5

Sales, Customers & Quote-To-Cash

Duration 4 weeks

Month Journey

Week 1: Customer setup, prices, payment and shipping terms

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Week 2: Sales quotations and sales order processing

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 3: Shipment, invoicing, returns and credit memos

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 4: Sales exceptions, collections and end-to-end validation

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Month 6

Purchasing, Vendors & Procure-To-Pay

Duration 4 weeks

Month Journey

Week 1: Vendor onboarding, purchasing controls and approvals

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Week 2: Purchase quotations/orders, receipts and invoicing

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 3: Vendor returns, credit memos and quantity discrepancies

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 4: Three-way matching, exception tickets and supplier analysis

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Month 7

Inventory, Costing & Warehouse Operations

Duration 4 weeks

Month Journey

Week 1: Item cards, units of measure and item tracking awareness

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 2: Inventory costing concepts, valuation and item ledger entries

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 3: Locations, transfers, availability and replenishment

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 4: Warehouse controls, stock discrepancies and cycle count case

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Month 8

Reporting, Excel & Power BI

Duration 4 weeks

Month Journey

Week 1: Financial statements, analysis views and dimension reporting

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 2: Operational reporting, filters and metric definitions

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 3: Excel analysis and controlled data exports

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Excel analysis and controlled data exports

Week 4: Power BI data model, KPI visuals and validation

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Month 9

Functional Consulting & Requirements Discovery

Duration 4 weeks

Month Journey

Week 1: Stakeholder identification and discovery interviews

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 2: Current-state process maps and pain-point analysis

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 3: Future-state process and functional requirements

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 4: Fit-gap analysis, solution options and change log

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Month 10

Solution Design, Data Migration & Integration

Duration 4 weeks

Month Journey

Week 1: Configuration blueprint, decisions and dependencies

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Week 2: Data migration mapping, cleansing and test loads

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 3: Microsoft 365, Power Automate and integration awareness

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 4: Security, deployment planning and design review

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Month 11

Testing, UAT, Training & Support

Duration 4 weeks

Month Journey

Week 1: Test strategy, scenarios and expected results

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Week 2: User acceptance testing, defect triage and retesting

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 3: End-user training materials and change adoption

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 4: Support desk simulations, incident diagnosis and go-live readiness

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Month 12

Integrated Implementation Capstone & Career Readiness

Duration	4 weeks

Month Journey

Week 1: Capstone discovery, solution scope and project plan

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 2: Configure, migrate sample data and execute core processes

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 3: Validate finance, sales, purchasing, inventory and reporting

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

Week 4: Final demonstration, viva, portfolio and certification review

- **Learning outcomes:** Define the business need; explain the relevant concepts and system dependencies; execute or model the task; identify a control or failure mode; validate and communicate the outcome.
- **Mentor-led activity:** Introduce a realistic client request, demonstrate the relevant process in the approved training environment, and model evidence-led investigation.
- **Learner workshop:** Complete a hands-on case using a fictional company, including a deliberate variation or error. Record steps, system output, observations and a short business explanation.
- **Weekly evidence:** Annotated process/configuration notes, screenshots or export where appropriate, validation checklist, a resolved issue or exception, and a brief reflection.

FairChild Institute

Salesforce Admin

FairChild Institute

FairChild Institute

Duration	8 weeks

Month Journey

Module (WK)	Lesson A	Lesson B	Capstone component	Mentoring phase
1. Salesforce Admin Fundamentals	1.1 The Admin Role & Navigating Salesforce (12 Jan)	1.2 Org Setup, Users & Security Model (14 Jan)	C1: Discovery & Security Design	Modelling
2. Opportunity Management & Sales Processes	2.1 Configuring Accounts, Contacts & Opportunities (19 Jan)	2.2 Building the Sales Process (21 Jan)	C2: Sales Process Build	Modelling → Guided practice
3. Lead Management & Scoring	3.1 Lead Capture, Import & Assignment (26 Jan)	3.2 Lead Scoring, Qualification & Conversion (28 Jan)	C3: Lead-to-Opportunity Engine	Guided practice
4. Pipeline Management & Forecasting	4.1 Pipeline Visibility & Data Quality (2 Feb)	4.2 Configuring Collaborative Forecasts (4 Feb)	C4: Pipeline & Forecast Setup	Guided practice → Coaching
5. Collaboration Tools & Team Workflows	5.1 Team Selling, Sharing & Approvals (9 Feb)	5.2 Activities, Email & Slack Collaboration (11 Feb)	C5: Team Workflow + Mid-point Review	Coaching
6. Reporting & Dashboards	6.1 Building Sales Reports (16 Feb)	6.2 Dashboards for Every Audience (18 Feb)	C6: Report & Dashboard Pack	Coaching → Independence
7. Customization & Automation	7.1 Customizing the Data Model & Lightning Pages (23 Feb)	7.2 Process Automation with Flow (25 Feb)	C7: Automation Build + UAT	Independence
8. Sales Enablement & Best Practices	8.1 Enablement, Adoption & Admin Best Practices (2 Mar)	8.2 Capstone Demo Day (4 Mar)	C8: Final Capstone	Peer / consultant level

FairChild Institute

Salesforce Flow

FairChild Institute

FairChild Institute

Duration	8 weeks

Month Journey

Module (WK)	Lesson A	Lesson B	Capstone component	Mentoring phase
1. Automation Foundations & Flow Builder Basics	1.1 The Automation Landscape & a Tour of Flow Builder (12 Jan)	1.2 Flow Building Blocks & Your First Flow (14 Jan)	C1: Automation Discovery & Inventory	Modelling
2. Record-Triggered Flows	2.1 Before-Save Flows (19 Jan)	2.2 After-Save Flows (21 Jan)	C2: Opportunity Automation Pack	Modelling → Guided practice
3. Working with Data	3.1 Get, Create, Update & Delete Records (26 Jan)	3.2 Loops, Decisions & Bulk-Safe Design (28 Jan)	C3: Account Roll-up & Bulk-Safe Rebuild	Guided practice
4. Screen Flows	4.1 Designing Screen Flows (2 Feb)	4.2 Launching Screen Flows (4 Feb)	C4: Guided Site Survey Wizard	Guided practice → Coaching
5. Scheduled, Autolaunched & Reusable Flows	5.1 Scheduled Paths & Schedule-Triggered Flows (9 Feb)	5.2 Subflows & Reusable Design (11 Feb)	C5: Time-Based Follow-up + Mid-point Review	Coaching
6. Error Handling, Debugging & Testing	6.1 Fault Paths & Debugging (16 Feb)	6.2 Flow Tests, UAT & Performance (18 Feb)	C6: Reliability & Test Pack	Coaching → Independence
7. Advanced Flow	7.1 Flow-Based Approvals & Orchestration (23 Feb)	7.2 Invocable Actions & Integrations (25 Feb)	C7: Approval & Integration Build	Independence
8. Governance & Capstone	8.1 Deployment, Migration & Governance (2 Mar)	8.2 Capstone Demo Day (4 Mar)	C8: Final Capstone	Peer / consultant level

FairChild Institute

Advanced Salesforce Admin

FairChild Institute

Duration	8 weeks

Month Journey

Module (WK)	Lesson A	Lesson B	Capstone component	Mentoring phase
1. Enterprise Security Architecture	1.1 Inheriting an Org: Health Audit & Permission-Set-Led Access (16 Mar)	1.2 Advanced Sharing (18 Mar)	Enterprise Security Architecture	Modelling → Guided practice
2. Enterprise Org Design	2.1 Enterprise Territory Management (23 Mar)	2.2 Multi-Currency, Translation & Delegated Admin (25 Mar)	C2: Territory & Global Org Design	Guided practice
3. Advanced Data Model & Data Management	3.1 Complex Data Modelling (30 Mar)	3.2 Large-Scale Data Loads & Migration (1 Apr)	C3: Data Model & Migration Plan	Guided practice → Coaching
4. Auditing, Monitoring & Compliance	4.1 Audit Trail, Login Forensics & Event Monitoring (6 Apr)	4.2 Data Governance, Privacy & Shield (8 Apr)	C4: Audit & Compliance Pack	Coaching
5. Advanced Sales Cloud	5.1 Products, Price Books, Schedules & Quotes (13 Apr)	5.2 Experience Cloud Partner Portal (15 Apr)	C5: Quote-to-Partner Build + Mid-point Review	Coaching
6. Advanced Analytics	6.1 Advanced Reporting (20 Apr)	6.2 Analytics at Scale (22 Apr)	C6: Executive Analytics Pack	Coaching → Independence
7. Environment Management & Release	7.1 Sandbox Strategy, Change Sets & DevOps Center (27 Apr)	7.2 Automation Governance & Troubleshooting (29 Apr)	C7: Release Plan & Automation Inventory	Independence
8. AI Administration, Org Strategy & Capstone	8.1 Einstein & Agentforce Administration and Org Strategy (4 May)	8.2 Capstone Demo Day (6 May)	C8: Final Capstone	Peer / consultant level

FairChild Institute

Salesforce Service Cloud Program

FairChild Institute

Duration	12 weeks

Month Journey

Module (WK)	Lesson A (Tue)	Lesson B (Thu)	Capstone component	Mentoring phase
1. Service Cloud Foundations	1.1 Navigating Service Cloud (12 Jan)	1.2 Org Setup & Security (14 Jan)	Discovery summary + org configured	Modelling
2. Case Management	2.1 Cases, Accounts & Contacts (19 Jan)	2.2 Designing the Support Process (21 Jan)	Support process blueprint	Modelling
3. Case Routing & Escalation	3.1 Queues & Assignment Rules (26 Jan)	3.2 Escalation & Auto-Response Rules (28 Jan)	Routing & escalation design	Modelling → Guided practice
4. The Service Console	4.1 Building the Service Console (2 Feb)	4.2 Agent Productivity Tools (4 Feb)	Agent console built	Guided practice
5. Omni-Channel	5.1 Omni-Channel Routing Fundamentals (9 Feb)	5.2 Skills-Based Routing & Supervision (11 Feb)	Omni-Channel live	Guided practice
6. Knowledge	6.1 Setting Up Lightning Knowledge (16 Feb)	6.2 Knowledge in the Flow of Service (18 Feb)	Knowledge base + mid-point review	Guided practice → Coaching
7. Entitlements, SLAs & Milestones	7.1 Entitlements & Service Contracts (23 Feb)	7.2 Entitlement Processes & Milestones (25 Feb)	SLA model in place	Coaching
8. Digital Channels	8.1 Email-to-Case & Web-to-Case (2 Mar)	8.2 Messaging for Web & Mobile (4 Mar)	Channel strategy built	Coaching
9. Self-Service & Collaboration	9.1 Experience Cloud Help Center (9 Mar)	9.2 Collaboration & Escalation Workflows (11 Mar)	Help Center + tier-2 workflow	Coaching → Independence
10. Service Reports & Dashboards	10.1 Building Service Reports (16 Mar)	10.2 Service Dashboards for Every Audience (18 Mar)	Supervisor & executive dashboards	Independence

Module (WK)	Lesson A (Tue)	Lesson B (Thu)	Capstone component	Mentoring phase
11. Customization & Automation	11.1 Customizing the Data Model & UI (23 Mar)	11.2 Automating Service with Flow (25 Mar)	Automation build + UAT	Independence
12. Service AI, Best Practices & Capstone	12.1 Service AI, Analytics & Best Practices (30 Mar)	12.2 Capstone Demo Day (1 Apr)	Final presentation	Peer / consultant level

FairChild Institute

Salesforce API

FairChild Institute

FairChild Institute

Duration	8 weeks

Month Journey

Module (WK)	Lesson A	Lesson B	Capstone component	Mentoring phase
1. API Foundations & Authentication	1.1 The Integration Landscape (18 May)	1.2 Integration Users, Connected Apps & OAuth (20 May)	C1: Integration Inventory & Auth Design	Modelling
2. REST API in Depth	2.1 Records, Queries & Upserts (25 May)	2.2 Composite Resources (27 May)	C2: ERP Customer Sync (REST)	Modelling → Guided practice
3. SOAP, Metadata & Tooling APIs	3.1 SOAP API (1 Jun)	3.2 Metadata API, Tooling API & CLI (3 Jun)	C3: Legacy Bridge & Metadata Pipeline	Guided practice
4. Bulk Data & API Limits	4.1 Bulk API 2.0 (8 Jun)	4.2 API Limits & Sync Design (10 Jun)	C4: Nightly Bulk Sync & Limits Budget	Guided practice → Coaching
5. Event-Driven Integration	5.1 Platform Events & Pub/Sub API (15 Jun)	5.2 Change Data Capture & Replay (17 Jun)	C5: Event-Driven Install Scheduling + Mid-point Review	Coaching
6. Calling Out & Custom APIs	6.1 Named & External Credentials, External Services (22 Jun)	6.2 Apex REST, Callouts & Salesforce Connect (24 Jun)	C6: Outbound Integrations & Partner API	Coaching → Independence
7. Security, Reliability & Monitoring	7.1 Securing Integrations (29 Jun)	7.2 Error Handling, Testing & Middleware (1 Jul)	C7: Security Review & Integration Run Book	Independence
8. Architecture & Capstone	8.1 Integration Patterns & Agent-Ready APIs (6 Jul)	8.2 Capstone Demo Day (8 Jul)	C8: Final Capstone	Peer / consultant level

FairChild Institute

Salesforce Development

FairChild Institute

Duration	10 weeks

Month Journey

Module (WK)	Lesson A (Tue)	Lesson B (Thu)	Capstone component	Mentoring phase
1. Developer Foundations	1.1 The Developer's Seat (20 Jul)	1.1 The Developer's Seat (20 Jul)1.2 Apex Language Fundamentals (22 Jul)	C1: Developer Environment & First Service	Modelling
2. Data in Apex	2.1 SOQL & SOSL in Apex (27 Jul)	2.2 DML, Governor Limits & Bulkification (29 Jul)	C2: Bulk-Safe Data Layer	Modelling → Guided practice
3. Object-Oriented Apex	3.1 Classes, Interfaces & Exceptions (3 Aug)	3.2 Separation of Concerns (5 Aug)	C3: Quoting Engine Design	Guided practice
4. Apex Triggers	4.1 Trigger Fundamentals (10 Aug)	4.2 Trigger Frameworks & Sharing (12 Aug)	C4: Trigger Framework & Installation Automation	Guided practice
5. Apex Testing	5.1 Unit Testing Fundamentals (17 Aug)	5.2 Mocks & Stubs (19 Aug)	C5: Test Suite + Mid-point Code Review	Guided practice → Coaching
6. Asynchronous Apex	6.1 Future, Queueable & Finalizers (24 Aug)	6.2 Batch, Scheduled & Event Triggers (26 Aug)	C6: Background Processing	Coaching
7. LWC Foundations	7.1 LWC Fundamentals (31 Aug)	7.2 Data in LWC (2 Sep)	C7: Solar Quote Builder Component	Coaching
8. LWC in Practice	8.1 Communication, Navigation & Placement (7 Sep)	8.2 Jest, Invocable Apex & Agents (9 Sep)	C8: Partner & Flow Extensions	Coaching → Independence
9. 9.1 Secure Coding (14 Sep)	9.1 Secure Coding (14 Sep)	9.2 Debugging, Performance & Static Analysis (16 Sep)	C9: Security & Performance Review	Independence
10. DevOps & Capstone	10.1 CI/CD, Packaging & AI-Assisted Dev (21 Sep)	10.2 Capstone Demo Day (23 Sep)	C10: Final Capstone	Peer / senior developer level

FairChild Institute

Month 1

HubSpot Foundations

Duration 4 weeks

Month Journey

Week	Module	Lessons	Capstone milestone	Mentoring stage
1	Orientation & Account Setup	1.1 The HubSpot Platform & the Client Brief · 1.2 Users, Teams & Permissions	Discovery brief + portal set up	Guided discovery
2	The CRM Data Model	2.1 Objects, Records & Associations · 2.2 Properties & Property Design	Data model diagram + property plan	Guided discovery
3	Lifecycle Stages & Data Import	3.1 Lifecycle Stages & Lead Status · 3.2 Importing & Cleaning Data	Clean data set + lifecycle definitions	Guided discovery
4	Segments, Views & Month 1 Checkpoint	4.1 Segments, Views & Filters · 4.2 Month 1 Checkpoint: CRM Configuration Review	Configured CRM v1	Guided discovery → Guided practice

FairChild Institute

Month 2

Marketing Automation

Duration	4 weeks

Month Journey

Week	Module	Lessons	Capstone milestone	Mentoring stage
5	Forms & Lead Capture	5.1 Forms & Lead Capture · 5.2 Landing Pages, CTAs & Conversion Paths	Lead capture assets	Guided practice
6	Email Marketing	6.1 Marketing Email, Consent & Subscriptions · 6.2 Testing, Deliverability & Email Performance	Email templates + consent model	Guided practice
7	Workflows	7.1 Workflow Fundamentals · 7.2 Building a Nurture Sequence	Nurture workflow v1	Guided Practice
8	Lead Scoring & Mid-Point Review	8.1 Lead Scoring & the MQL Handoff · 8.2 Mid-Point Capstone Review	Automated nurture sequence + mid-point review	Guided practice → Coaching

FairChild Institute

Month 3

Sales & Service Operations

Duration 4 weeks

Month Journey

Week	Module	Lessons	Capstone milestone	Mentoring stage
9	Deals & Pipelines	9.1 Deal Pipelines & Stages · 9.2 Deal Automation & Sales Workflows	Pipeline design + deal automation	Coaching
10	Sales Productivity & Forecasting	10.1 Sequences, Meetings & Templates · 10.2 Products, Quotes & Forecasting	Sales pipeline	Coaching
11	Tickets & the Help Desk	11.1 Ticket Pipelines & the Help Desk · 11.2 Routing, SLAs & Service Automation	Ticket pipeline + routing rules	Coaching
12	Knowledge Base & Customer Feedback	12.1 Building the Knowledge Base · 12.2 Customer Feedback & the Customer Portal	Service workflow	Coaching → Independence

FairChild Institute

Month 4

Integration, Reporting & Optimization

Duration 4 weeks

Month Journey

Week	Module	Lessons	Capstone milestone	Mentoring stage
9	Reporting & Dashboards	13.1 Building Custom Reports · 13.2 Dashboards & Attribution	Executive and team dashboards	Independence
10	Sales Productivity & Forecasting	14.1 The App Marketplace & Data Sync · 14.2 APIs, Webhooks & Private Apps	Integration plan + one live integration	Independence
11	Tickets & the Help Desk	15.1 Portal Audit & Governance · 15.2 Capstone Clinic & Peer Review	Audit report + UAT sign-off	Independence
12	Capstone Demo Day	16.1 AI in HubSpot & Presentation Rehearsal · 16.2 Capstone Demo Day & Career Next Steps	Integrated HubSpot implementation	Coaching → Independence
